b. Security Shelving [redacted] P&SCB has an unfunded requirement for both power shelving and self propelled shelving to accommodate the moves of Security Records Division files and Polygraph files to [redacted] Building. Current plans would require these files to be in place 1 September 1983. There are several problems that must be surmounted: 1) need to know if a sprinkler system will be required, 2) need to know when the area will be available for a contractor to start installation, and 3) need an adequately defined specification for what is desired. Once these are determined, P&SCB will compete for shelving and installation under the mandatory Federal Supply Schedule rather than accept the sole source request made by the Director of Security.
